

Greg Davis

Greg has a BS from The Ohio State University in Landscape Horticulture. Following twelve years of continual promotions at a national landscape provider, Greg moved to Environmental Management (EMI) to the current role of Director of Strategic Initiatives. In this role, he spearheaded all of our business changes related to the COVID19 pandemic. EMI was considered an essential business at the beginning of the pandemic so we needed to act swiftly to alter our safety plan and not let our clients down and keep our team safe. At EMI, Excellence is the Only Acceptable Outcome and Greg helped define our actions to lead us through.
